Revised 10/25

Perry County's Septic Permit Process

1 - Complete an application – See attached.

2 - Obtain a Soil Analysis - Contact a Registered Soil Scientist to perform the soil analysis. Choose from the listed soil scientists on the provided Resource List, or from the Indiana Registry of Soil Scientists (link provided). The soil analysis results will be sent to the person requesting the evaluation and the Sanitarian for review and determination of the suitability of the soil and the type/types of system(s) that will work in the location of the analysis. Mark all the pits/borings in a semi-permanent way, such as stakes or fence posts. Flags are acceptable if they are marked as such (soil evaluation site), and not disturbed or removed. Altering the soil evaluation sites will result in the need for a new soil evaluation. Protect the potential Septic System site from disturbance or altering prior to construction. Such as: fill material, cutting, scraping, compaction, removal of soil or large trees.

3 – Installer: complete the design and installation packet and submit to Sanitarian - This packet must be completed by the installer, submitted to the Sanitarian's office and reviewed prior to the first on-site visit. Contact the Sanitarian's Office for a printed copy. Any easement or right of way requirements must be recorded in the Recorder's Office and a written copy must be provided (owner's responsibility) prior to the issuance of a Septic Permit.

4 – First on-site inspection by Sanitarian - The installer must be available to be on-site at the time of initial inspection. The site should be clearly laid out and flagged per the installers design plans.

*In accordance with IC 16-41-25-1(a): After receiving all of the necessary paperwork it may take up to 30 days for the Sanitarian to issue or deny a Septic System Permit

5 - Septic Permit issued - Upon approval of the first on-site inspection, the Sanitarian will issue the Septic Permit to the applicant. The Permit is issued at the Sanitarian's Office (3214 Tell Street, Tell City, IN 47586). The Permit fee is \$100 payable by cash, check, credit card (with 3% processing fee) or money order to the Perry County Health Department.

6 - Cover inspection by Sanitarian - The Sanitarian must inspect the installed Septic System before it is covered. The installer must notify the Sanitarian at least 48 hours before the Septic System is planned to be installed. The installer must be on-site at the time of the cover inspection with proper equipment and to be able to answer any questions.

SOIL SCIENTISTS

Below is a list of soil scientists who come to Perry County, along with contact information:

Jack Coulter 812-525-1896

Becky Langford 812-483-2544 becky@soilprosplus.com
